

CAPE MAY COUNTY 4-H EQUINE HEALTH CLINIC

NOVEMBER 6, 2020

Greetings Cape May County Horse Owners,

A second Equine Health Clinic will be offered in 2020. The date is set for November 6th.

The primary purpose of this clinic is to booster Influenza-Rhinopneumonitis vaccines to provide disease prevention until April. Any horse that is in contact with other horses through showing or trail riding needs a booster every six months. And, although the vaccines companies say the encephalitis vaccines are safe for a year, six-month boosters are recommended for horses at high risk or those that may have a stressed immune system.

Older horses may need additional precautions. According to the University of Kentucky Extension, it is important that owners maintain geriatric horses on a regular vaccination program that keeps them up-to-date on all core vaccines. For older horses that still travel and compete regularly, consult your veterinarian for additional vaccination advice.

Deworming is also important this time of year to prevent tapeworms and bots. Equimax has been specifically chosen for that purpose.

The following services will be offered:

MEDICATION/SERVICE	PRICE
<i>Helpful Combinations:</i>	
VETERA GOLD (3-way + WNV + Influenza + Rhinopneumonitis) – <i>For the horse that travels. Add Rabies and Coggins Test.</i>	\$75
